

Minnesota Speeding Facts

- In 2016–2020 in Minnesota, illegal or unsafe speed was a contributing factor which resulting in 487 deaths.
- During the same period, fatalities resulting from speed-related crashes cost Minnesota over \$787 million.
- Illegal or unsafe speed is a leading contributing factor in fatal crashes. In 2020, 122 people were killed in speed-related crashes.
- In 2016–2020, illegal or unsafe speed was cited in 36 percent of all alcohol-related fatal crashes.
- Over the five-year period, 2016–2020, 58 percent of the speed-related fatal crashes occurred in rural areas (less than 5,000 population).
- In 2016-2020, illegal or unsafe speed accounted for 34 percent of the factors cited in fatal crashes for drivers under age 30, compared to only 12 percent of the factors cited for drivers age 65 and older.
- NHTSA (National Highway Traffic Safety Administration) reports nearly 60 percent of all drivers report seeing speeding vehicles all or most of the time when they drive on residential streets as well as highways.
- NHTSA research shows motorists wrongly believe speeding is not a great risk to safety or as serious as other traffic violations. In reality, the consequences of excessive speeding include:
 - o Greater potential for loss of vehicle control
 - o Increased stopping distance
 - o Increased crash severity leading to more numerous and severe injuries.
